

Aleris Goes Green!

All Aleris Rainware Products Are Now Being Shipped With **Green Backer**

At Aleris we strive to give our customers the products they need, when they need them. Aleris gutter coil is precision manufactured and made from the finest sustainable aluminum sheet, in 3105/3025 alloys. These products have been third-party GreenCircle certified to help you achieve your sustainable initiatives.

Prior to painting, the metal is extensively cleaned to ensure excellent paint adhesion for our polyester coatings providing superior long term corrosion resistance. The coating is baked on and designed for compatibility with environmentally friendly, chrome-free pretreatment system that is RoHS compliant. You will now be able to distinguish the Aleris gutter coil by the green low gloss backer.

The exterior paint system is exclusively formulated and features the latest in coating technology. The exterior paint is available in flat, satin and semi-gloss finishes and provides triple resistance against mold, mildew and algae growth, as well as maximum UV protection. The coating system has been formulated specifically for superior performance and is available in a wide variety of colors.
